

TRIOMATIC COUPLINGS WITH IMPROVED DESIGN

With a new TrioMatic design we have responded to the stringent requirement of customers to differentiate the WABCO TrioMatic coupling from copy or fake parts.

We have improved the design of this safety component by delivering adjustments to the wear-intense areas, casting and overall product appearance.

IMPROVEMENTS

- Male part coupling forehead is machined to provide better sealing
- Casting type change delivered lighter parts while maintaining corrosion resistance and tightened tolerances
- Part appearance has been improved by introduction of the WABCO corporate design

New WABCO TrioMatic couplings

VARIANTS

Variant	Male	Female
Product number	452 808 002 0	452 806 000 0
Product		

CONNECTION

Make sure parts are connected in the correct way:

- Open jaws
- Place male part inside
- Pull male part down to seat
- Release handle, allowing the jaw to close and clamp successfully

INTERCHANGEABILITY

Due to the design improvements you may encounter difficulties with interchangeability of the new improved male part and the old female part. This can easily be overcome by positioning accurately the male part into the female connector.

Please contact your WABCO Partner in case you may encounter any difficulties. All other combinations between new/new couplings and old/new couplings are matching well and the connection is tight and secure.

Information on WABCO products can be found in our [INFORM](http://inform.wabco-auto.com) product catalogue (inform.wabco-auto.com) by entering the product number in the "Product Number" search field.

Please contact your [WABCO partner](http://www.wabco-auto.com/findwabco) for further information (www.wabco-auto.com/findwabco).
